Priscilla:

Overall the write-up that Greg Galecki did looks fine. I would make one addition to the 4th paragraph where the lack of fill material is discussed. We understand that the lack of fill material will result in still having a small amount of "cut" visible. We can live with that. We specifically do not want them to pull material down from above to obliterate the cut. This will just make the cut steeper.

South Fork Eccles

Hello,
Do you have any comments on the South Fork reclamation plan? If
please send them to me via email today, so I can relay them to Gregg
Galecki and he will make modifications after the bid assignment
tomorrow.
Thanks,
Priscilla.
